

Pump Stations

Vertical | Horizontal | Compact

The Premier Tech Aqua UK Pump Station range is designed for multiple applications including single households and large residential developments, caravan and holiday sites along with commercial and industrial projects.

Renowned throughout industry for their flexible and adaptable design, our range of **compact, vertical** and **horizontal** pump stations are suitable for raising sewage, effluent, wastewater and surface water in locations where a gravity discharge is unachievable.

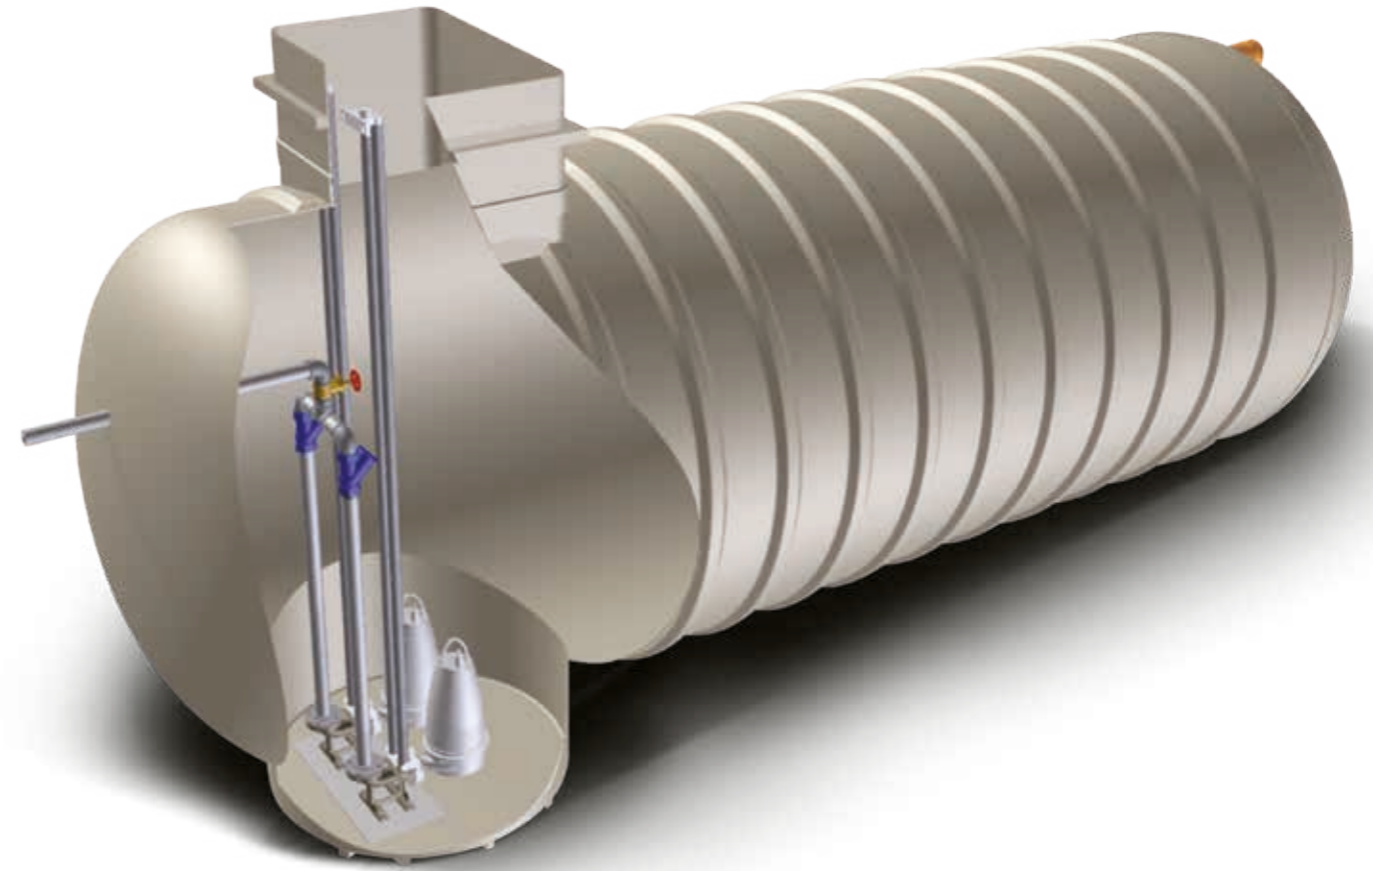

Compact Pump Stations

Quick and easy to install, the Premier Tech Aqua UK compact pump station is manufactured in GRP with a 900 or 1500 litre storage capacity as standard.

It includes a UPVC pipework kit and is available in single or dual 50mm options. An integral float switch or float switch set-up with a separate control panel is also available.

Vertical Pump Stations

The Premier Tech Aqua range of vertical GRP pump stations are offered in a range of diameters and depths. These include 1.2m, 1.5m, 1.8m, and 2.5m diameters, all to a depth of 5.0m as standard.

Horizontal Pump Stations

Boasting Europe's largest Glass Reinforced Plastic (GRP) manufacturing facilities, we can produce pump station solutions with a storage volume of up to 250,000 litres in a single tank.

Available in a range of diameters and lengths including 1.0m, 1.2m, 1.5m, 1.8m, 2.5m, 3.0m and 4.0m, to a maximum length of 22m as standard.

Available options include:

- Single or Dual pumps
- 50mm, 65mm and 80mm solids handling capacity

Our Horizontal and Vertical Pump Stations are designed specifically for easy-installation and are fully fitted with an industry leading quality pump; integrated galvanised steel pipework kit; pedestals; lifting bracket and chain; float switch set-up and a control panel.
